### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The disclosure is objected to because of the following informalities: there are no headings, e.g. Brief Description of the Drawings, is the specification. Appropriate correction is required.

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: "drawer bottom (12)" should be "drawer bottom (10)" and in the second from last line, "he" should be "the". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 1, it is unclear whether or not the drawer bottom and/or the drawer frame are to be claimed in combination with the connector components. In the preamble of the claim, only an arrangement of the components are positively claimed; however, in the body of the claim, the drawer bottom and frame are positively recited. Furthermore, it appears that the frame and components comprise the same features, i.e. web, support leg, slot and claws. For examination purposes, the combination, i.e. the drawer bottom, components and frame, will be considered the claimed subject matter. Also for claim 1, "the facing lateral edge", "the associated plate-shaped drawer bottom", "the end face of the edge of the drawer bottom", and "the support surface" lack antecedent basis. Finally, "each support leg" lacks antecedent basis, since only one leg has been claimed previously. For claim 2, "the leg regions" lacks antecedent basis. Also, it is improper to state the fixing claw as a singular feature, since only plural claws have been claimed previously. Regarding claim 4, the use of "-like" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "-like"), thereby rendering the scope of the claim unascertainable. For claim 7, it is unclear which component is being referred to, since plural components have been claimed previously. For claim 9, the phrase "which is disposed or indirectly on the guide" is confusing. For claim 11, stating that a feature is "known per se" renders the claim indefinite, because many different types of dampers are known, thereby rendering the scope of the claim unascertainable.

***Allowable Subject Matter***

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. (The allowable subject matter being the drawer frame having connector components, each with a vertical connecting web and a pair of parallel offset leg portions extending perpendicular with respect to the web. In the leg portions is a closed slot having fixing claws attached to its edges.)

Claims 2-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
